Install an app on an Android phone

Short description: You can download and install an app of your choice that is available in the **Play Store** app on your Android phone.
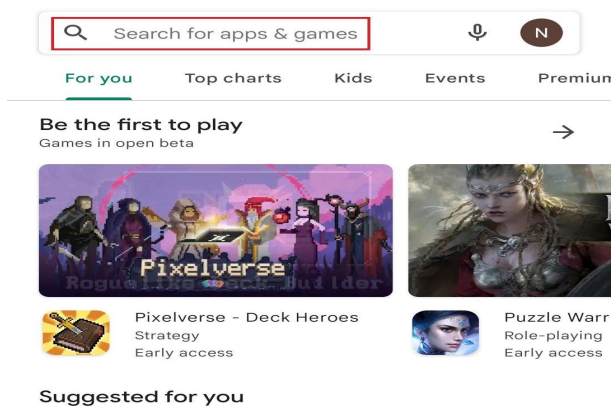

Before you begin:
- Make sure you sign-up on your **Play Store** app with an active Google account.
- Make sure the application that you want to download is supported in the country and region you are located in.
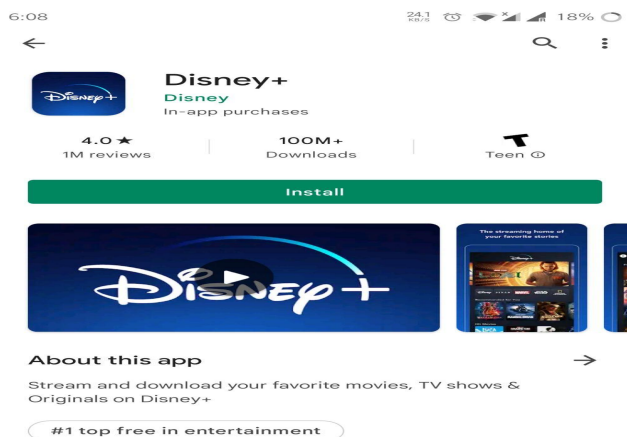

For more information about the **Play Store** app, see Google help articles.

Procedure:
1. On your device, go to the application section.
2. Tap on the **Play Store** app.
3. In the **Search bar**, type the name of the desired app.

4. Open the app page from the search results and click **Install**.

Caution: If your device does not have enough memory, the download can be disrupted.

Result: The app is downloaded. Click **Open** to use the app.
